

## Screw conveyors

Our grain conveyor screws, as well as some auger screws are fitted with a coil placed on a handle. [The special feed](#) is a key technical feature that increases productivity considerably. Such as [special feed](#) cannot be found on any other screw conveyor in Europe.

**The benefits of screw conveyors with special feed provide the following benefits:**

- Higher longevity of the screw conveyor
- 15% additional performance (compared to similar straight standard conveyor coils)
- Improved uptake of the goods conveyed also in the event of steeper conveyor angle
- Lower performance drop resulting from the angle of the screw conveyor
- High performance at low rotation speeds (max. 450 r/min)
- Enables more careful conveying and therefore less damage

**The following conveyor screws are included in the product range of CanAGRO:**

•

Stationary screw conveyors

•

Mobile conveyor screws

•

Flat storage collection system

- 

Feed screws
